Art Unit: 2838

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-14, 19, 20, and 30-35 are, drawn to power supply, classified in class 363, subclass 15.
 - II. Claims 15-18 and 21 are, drawn to frequency controller, classified in class 363, subclass 157.
 - III. Claims 22 and 45 are, drawn to controller for plurality of converter, classified in class 363, subclass 65.
 - IV. Claims 23-28, 36-38 and 40-44 are, drawn to switch controller, classified in class 363, subclass 16.
 - V. Claims 29 and 39 are, drawn to rectifier, classified in class 363, subclass 125.
 - VI. Claim 46 is, drawn to power factor correction, classified in class 363, subclass 39.
 - VII. Claims 47 and 48 are, drawn to over voltage protection, classified in class 361, subclass 91.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I, II, III, IV, V, VI and VII are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions are rectifier, frequency controller, power factor correction, over voltage protection, switch controller, power supply and controller for plurality of converter.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. Because these inventions are distinct for the reasons given above and the search required for Group I, II, III, IV, V, VI are not required for Group VII, restriction for examination purposes as indicated is proper.

5. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

6. A telephone call was made to Jeffrey Moy on 1/31/05 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

7. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
